

PROSPECTIVE PRODUCT CONTENT LABEL¹

The residential and commercial product matches 100% of your estimated electricity usage. The product will be made up of the following new renewable resources averaged annually.

Green-e Energy™ Certified New ² Renewables in GreenCurrents		Generation Location
-Biomass	15%	Michigan
-Wind	85%	Michigan
TOTAL	100%	Michigan

1. These figures reflect the renewable energy that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you the actual resource mix of the renewable energy you purchased during the preceding year.

2. New Renewables come from generation facilities that first began commercial operation on or after 1/1/97.

3. Eligible hydroelectric facilities are defined in the Green-e Energy™ National Standard (http://www.green-e.org/getcert_re_stan.shtml) and include facilities certified by the Low Impact Hydropower Institute (LIHI) (www.lowimpacthydro.org); facilities that are run-of-the-river hydropower facilities with a total rated nameplate capacity equal to or less than 5 MW; and facilities comprised of a turbine in a pipeline or a turbine in an irrigation canal.

For comparison, Detroit Edison's fuel mix includes: Coal (77.1%), Nuclear (19.6%), Natural Gas (1.8%), Oil (0.3%), Hydroelectric (0.1%) and Renewable Fuels (1.1%).

For specific information about this electricity product, please contact DTE Energy, 1-866-207-6955, www.greencurrents.com.

Green-e Energy™ certifies that GreenCurrents meets the minimum environmental and consumer protection standards established by the non-profit Center for Resource Solutions. For more information on Green-e Energy™ certification requirements, call 1-888-63-GREEN or log on to www.green-e.org.

PROSPECTIVE PRODUCT CONTENT LABEL¹

The residential product is sold in blocks of 100 kilowatt-hours (kWh) and will be made up of the following renewable resources.
