

Small and Medium Business Program

Energy efficiency **made easy**

The DTE Energy Small and Medium Business Program can help your business save. Learn about your business' energy health, become more energy efficient and improve your space. It all starts by scheduling a no-cost, no-obligation appointment, where your business will receive a(n):

Energy assessment

A qualified energy advisor will walk through your space, show you opportunities for efficiency and discuss any improvements you may have in mind.

Energy-saving products

During your assessment, we will install complimentary energy-saving products, such as LED screw-in bulbs, and smart thermostats to help kickstart your path to efficiency.

Personalized energy report

This document will provide a recap of your assessment along with recommendations for optional energy-efficient upgrades and available rebates.

Available rebates

When you make qualifying energy efficiency upgrades, your business can receive rebates designed to make your projects more affordable and reduce out-of-pocket costs. Rebates are available for the following upgrades:

- Interior and exterior LED lighting
- LED refrigerated case lighting
- Anti-sweat controls
- Infrared heaters
- Instantaneous water heaters
- Boiler and furnace tune-ups
- Strip curtains
- Door gaskets
- Electronically commutated motors (ECM)
- Natural gas furnace
- High efficiency boilers
- Clothes washers
