

Small and Medium Business Program

Energy efficiency **made easy**

The DTE Energy Small and Medium Business Program can help your business save energy. Learn about your business' energy health and become more energy efficient. It all starts by scheduling a no-cost, no-obligation appointment, where your business will receive a(n):

Energy assessment

A qualified energy advisor will walk through your space, show you opportunities for saving energy and discuss any improvements you may have in mind.

Energy-saving products

During your assessment, we will install complimentary energy-saving products, such as bathroom faucet aerators and smart thermostats, to help kickstart your path to efficiency.

Personalized energy report

This document will provide a recap of your assessment along with recommendations for optional energy-efficient upgrades and available rebates.

Available rebates

In addition to the no-cost program benefits, your business can also receive rebates when you make qualifying energy-efficiency improvements. These rebates are designed to make the project more affordable and reduce your upfront costs. Rebates are available for a range of qualifying upgrades, including:

- Smart thermostats
- Instantaneous water heaters
- Boiler and furnace tune-ups
- High efficiency boilers
- Infrared heaters
- Clothes washers
- Natural gas furnace
