

Powering the Digital World

Data centers are the beating heart of our digital world, and the power for this digital revolution needs to be clean, reliable and affordable energy. That is why Michigan and DTE Energy are your trusted partners to invest in your data center infrastructure.

Reasons to Invest in Michigan

Why Michigan?

Michigan is ranked 2nd in the Midwest for low business taxes. Data center equipment is exempt from Michigan sales and use tax as well as other tax reform measures which makes Michigan a highly

competitive location. Michigan's favorable business climate is also matched by our low risk for major natural disasters, making the state the perfect location for your long-term needs.

Sustainability Programs

With [MIGreenPower](#) (MIGP), you can make up to 100% of your electric use powered with renewables – without having to install any additional infrastructure. DTE Gas and [DTE Vantage](#) also offer a suite of services to help our customers account for and sequester their emissions.

Cost in Aid Construction (CIAC) Credit Program

DTE Energy offers an improved formula for cost sharing to build electric infrastructure for new or expanding businesses that are large energy users. Businesses with 1,000 kilowatts (kW) or greater of electric demand, that are willing to enter into service provider contracts with the utilities, could see attractive credits offered on your energy bill based on your terms of service.

System / Transmission Reliability

DTE is a member of the Midcontinent Independent System Operator (MISO) with access to high-voltage electric transmission infrastructure to meet any customer demands and is planning a significant investment to upgrade and expand the infrastructure of both the transmission and distribution systems.

Long-Term Investment Strategy

DTE's recently approved [Integrated Resource Plan](#) and [five-year roadmap](#) for the distribution system ensures the company is upgrading, expanding and adding additional capacity to generate and delivery the energy your data center will need. Our system operated without incident 99.9% of the time, and our investment plan and system upgrades will strengthen our system further.

Available Sites

Selecting the right site for your new venture in Michigan is the most important and complex decision you'll make. Workforce, zoning and transportation are just some of the factors you'll be weighing. By engaging DTE as a partner in your site selection process early, we can quickly and efficiently evaluate sites and available energy resources. Our expert knowledge and extensive data will streamline your search and put you on the path to success.

Infrastructure Investments

In 2024, DTE invested over \$3.7 billion into improving electric reliability and generating cleaner energy for its customers.
