

Outdoor Protective Lighting

Security lighting for your cannabis business

DTE Energy aspires not only to be the best in the world, but the best for the world. We strive to be more than an energy provider by improving lives with our energy. One way we do this is by supporting business growth in Michigan. DTE's Community Lighting team works with businesses to achieve their needs through our expertise and solution-based offerings. We have been leading the lighting business for more than 110 years, and our experienced team can help design an effective, budget-conscious lighting solution that will meet your unique needs.

There is an increasing demand for cannabis distribution in Michigan, including grow facilities and retail businesses. DTE's outdoor protective lighting provides a safe environment for these business outlets and is effective in deterring crime.

Our energy-efficient products offer superb lighting from dusk until dawn to deter crime from your cannabis business. Our affordable lighting options also come with preventative and reactive maintenance services, so you don't have to compromise the safety and security of your property over fear of future maintenance costs.

DTE is a single source solution for lighting your business's property. We can provide all estimating, engineering, project management and construction services to install the perfect lighting system for your business.

Our area lighting fixtures will create a well-lit parking lot, keeping your business secure and safe. The monthly cost would range between \$30-\$45 per month*.

Flood lights can be mounted directly onto utility poles on your property, providing substantial light output at a reasonable cost. The monthly cost for these lighting fixtures would range between \$13-\$29 per month*.

What are the benefits of purchasing lighting from DTE?

- We'll provide hands-free maintenance at no cost to you if your light ever needs servicing.
- You'll have affordable, predictable monthly fees added to your DTE electric bill that includes service for power outages, mechanical issues, third party damages, scheduled equipment maintenance and more.
- Our large portfolio of energy-efficient lighting products delivers optimal performance while keeping your costs low.
- Dedicated outage analysts will manage any reported issues with your lights.
- If you qualify for the post charge funding option, there is little to no upfront cost to purchase our lighting.
