

DTE CleanVision

Business Charge Connect

Is your business interested in electric vehicle (EV) charging, but you don't know where to begin? Or maybe you have an initial plan in place, but you don't have the resources or time to oversee multiple contractors?

DTE has the right solution for your business with turnkey EV charger installation and engineering support – all through a dedicated team of professional DTE experts.

DTE's team of experts will manage your electric vehicle charger installation for your business. Once you purchase your chargers, we'll handle the rest. By working with DTE, our professional service experts will become a part of your team, and they will be tasked with planning, designing, and executing your EV charging infrastructure. Some of the technical details our experts will manage include:

Applying for EV charger rebates

Engineering and Design

Surveying your site

Permitting

Electrical Construction

What Makes DTE Business Charge Connect Different?

Our experts will become your personal point of contact and a member of your team. They'll make the project a seamless experience for you by removing the need to coordinate with multiple vendors like electricians, engineers, and other construction contractors needed to complete a charger project.

At DTE, we understand how important it is to help our customers make the transition to electric vehicles simple. This allows you to focus on what's most important – supporting your customers and growing your business.
