SUBJECT: Planned System Maintenance - Update

Effective Gas Day 07/13 - Timely Cycle until Gas Day 08/21 – Intraday 3 Cycle, DTE Gas Operations are expected to be constrained due to a planned Compressor Maintenance. The work is expected to impact Storage Injections and EUT Deliveries. The 30" Pipeline Remediation originally included the 30" MLV Replacement and Compressor Maintenance, however, due to a change in the scope of the remediation, the valve replacement and compressor maintenance are now being listed as individual outages.
