Additional Operational Information

Deliveries to DTE Gas Company Storage Injection (9036), IBS Injection (9501), Balancing Injection/Delivery (9525), and EUT nominations are expected to be restricted.

Vector Milford Junction Delivery (9237) and Receipt (9137) availability will depend on daily system operating conditions.

MichCon Storage Withdrawal/Pool (9196) is not expected to be reduced. DTE Gas recommends using this receipt location for EUT deliveries during the remaining maintenance period.

Customers should monitor DTE's eNominator System, Gas Nominations webpage, and direct email communications for updated Operational Notices.

We appreciate your assistance and support during these critical operations.
