

Notification: Sep/Oct/Nov MDQ Review

If you do not serve End User Transportation (EUT) customers, please disregard this note.

Dear EUT Brokers:

The September, October and November 2022 Maximum Daily Quantity (MDQ) values have been determined and are available in eNominator. First-year contract customers are excluded from this process. The September, October and November MDQs will not be posted! To obtain the MDQs, please run the eNominator report titled 'EUT Location MDQ Summary' (RPT_K61). This report can be found under Report Type 'CAW Contracts'. Please contact DTE Gas Nominations at 833.383.6667, if you need assistance accessing the report.

DTE Gas will only allow increases to the September, October and November MDQ values if the customer provides documentation to their DTE Gas Account Manager that the EUT monthly usage is greater than the September, October and November MDQ values.

Please note that per the DTE Gas tariff, monthly injections into storage during September, October and November greater than 1.43% of a customer's ACQ will be subject to an Excess Storage charge of \$0.25 per MMBtu. The tariff also provides for DTE Gas to retain Gas-in-Kind (GIK) on volumes nominated to EUT accounts, in addition to any excess gas in a customer's storage account as listed below:

- For rate schedules ST, LT and XLT, GIK is 1.41% and excess gas in storage is any volume greater than 10% of ACQ.
- For rate schedule XXL, GIK is 1.00% and excess gas in storage is any volume greater than 5% of ACQ.

Please contact your Account Manager, if you have any questions or if an excess storage condition exists.
