# ELECTRIC PRICING OPTIONS

Giving you control  
of your energy

At DTE Energy, we're committed to providing safe, reliable and affordable energy to our customers. The price you pay for electric service covers our costs to generate and deliver electricity to you. Most of our customers are on the **Residential Electric Service Rate**. This guide offers additional rate options to give you more choice and more control over your energy.

## Want to reduce your carbon footprint?

The new **MIGreenPower** program is an easy and affordable way to support a greener Michigan. Visit [dteenergy.com/MIGreenPower](https://dteenergy.com/MIGreenPower) for more info.

**Net Metering:** get energy credits if you generate electricity from renewable resources like solar or wind energy.

**Interruptible Water Heating Service Rate:** provides a lower rate for electric water heater usage and allows DTE to briefly cycle on and off the heating elements of your water heater.

**Outdoor Protective Lighting:** get dusk-to-dawn, protective security lighting using existing DTE Electric utility poles.

## Time of Day options

You save money by using energy offered at lower prices during specified (off-peak) times per day.

**Residential Time of Day Rate Option:** saves you money as you use more electricity in the off-peak hours; weekdays before 11 a.m. and after 7 p.m.; and all weekend long.

**Dynamic Peak Pricing Rate:** manage your energy use and save with this rate that offers price changes throughout the day (Monday - Friday). To qualify for this rate you must have the new advanced meter.

**DTE Energy**<sup>®</sup>

**Interruptible Space Conditioning Service Rate (CoolCurrents<sup>®</sup>):**

saves you money on the cooling portion of your bill by allowing DTE to briefly cycle on and off your air conditioning unit (includes air source and heat pumps) when demand for electricity is high.

**Geothermal Rate Option:**

saves you a portion off the regular heating and cooling rate when your equipment operates during off-peak hours; weekdays before 11 a.m. and after 7 p.m.; and all weekend long.

**Experimental Electric Vehicle Rate Option 1:**

helps save on your electric bill when you charge your vehicle during off-peak hours; weekdays after 11 p.m. and before 9 a.m. Or

**Experimental Electric Vehicle Rate Option 2:**

you are charged a flat monthly fee per vehicle, including surcharges and credits.

On average, a residential customer who uses 630 kWh per month pays about \$100. Here's the breakdown of how your energy dollar is used:

**53¢** Power Supply

**8¢** Service Charge

**36¢** Distribution

**3¢** Surcharges

Learn more about these charges on your bill at [dteenergy.com/rates](http://dteenergy.com/rates)

## Need more ways to save?

Manage your energy bill with DTE's energy efficiency programs, rebates, and tips. Learn more at [dteenergy.com/saveenergy](http://dteenergy.com/saveenergy)

## Want more help?

At DTE Energy, we're committed to empowering you to create a more flexible billing and payment arrangement through a variety of billing and payment options tailored to your needs. Visit [dteenergy.com/options](http://dteenergy.com/options), or speak to a DTE customer representative at **800.477.4747**.

*\*The Residential Electric Service Rate offers a \$3.75 per month senior credit for head of household customers 65 years of age or older.*

The price you pay for electricity at your home or business reflects the cost to build, finance, operate and maintain both the power plants that produce the energy, as well as the distribution system—overhead/underground power lines, substations, and poles.
