

DTE Electric Company — Monroe Power Plant Coal Combustion Residuals Annual Fugitive Dust Report

Report Summary

This annual CCR fugitive dust control report has been completed pursuant to 40 CFR 257.80(b)(7)(c). The report includes a description of actions taken to control CCR fugitive dust, a record of citizen complaints, and a summary of any corrective measures taken. In summary, this report documents that the fugitive dust control measures are applicable and appropriate for site conditions.

CCR Fugitive Dust Control Actions

- a. No control activities were required at the Fly Ash Basin beyond the daily maintenance and operational control activities completed pursuant to the site fugitive dust plan.
- b. No control activities were required at the Vertical Extension Landfill beyond the daily maintenance and operational control activities completed pursuant to the site fugitive dust plan.
- a. No additional control activities were required for the inactive Bottom Ash Impoundment beyond the daily maintenance and operational control activities completed pursuant to the site fugitive dust plan.

Citizen Complaints

No citizen complaints were received from November 1, 2021 to October 31, 2022.

Corrective Actions Taken

No CCR-related corrective actions were necessary from November 1, 2021 to October 31, 2022.
