

DTE Electric DE-#####

Notice: Affected System Study Required for Generator Interconnection to DTE Electric's Distribution System

DTE Electric Company (hereinafter "DTE Electric") received from _____ ("Project Developer") submitted by agent _____ a ### kW / ### kVA generator interconnection application with an export capacity of ### kW and information concerning Project Developer's project ("Interconnection Request") for a Level # project for a system of type _____ for a generator of type _____ proposing to interconnect at _____ location with project number DE-##### assigned by DTE Electric on [MM/DD/YYYY](#).

DTE Electric has determined during the study of DE-##### that an affected system condition is present and hereby notifies Project Developer that an Affected System Study may be required by _____ ("Affected System Owner"). The Affected System Study must be completed by the Affected System Owner before the Interconnection Request for DE-##### can proceed.

DTE Electric notified the Affected System(s) on [MM/DD/YYYY](#) (mm/dd/yyyy) and will coordinate with the Affected System Owner. However, the Project Developer is responsible for the Affected System Study, if necessary, and facilitating completion of Affected System Study, including, but not limited to, providing necessary generator-related information, all communications, deposits/fees, project delays, and any other impacts to the Interconnection Request that are required or result from the Affected System Study.

Project Developer is responsible to ensure the Affected System Owner(s) submits a copy of the completed study(s) to DTE Electric. Thereafter, DTE Electric shall proceed with the interconnection process.
