

## Contact Information

### Pre-Applicant Contact Information

#### Name \*

#### Company

#### Address \*

#### Email \*

#### Phone \*

#### Project Name \*

## Project Location

Select any of the following to provide proposed project location information. These will be used to identify a proposed point of interconnection to DTE system.

At least one location identifiable attribute must be provided to submit a Pre-Application.

Street Address

#### Address \*

Area Map Attachment

#### Attachment Name \*

Allowed file types: .pdf, .kml, .kmz, .docx

GPS Coordinates

#### Latitude (Decimal Degrees West) \*

Longitude (Decimal Degrees North) \* ?

Project Location DTE Account or Meter Number

DTE Meter Number \*

DTE Account Number \*

Will this resource be participating in a Market program with MISO? If so, which one?

Is a new electrical service requested for this property? \*

Minimum Current (if available)

Maximum Current (if available)

How is the load expected to change? \*

---

---

What voltage level will the project be connecting to

Select... ▼

---

Note: These are DTE Electric's operating voltages. A specific voltage may not be in the area you are applying for.

Proposed DER will serve onsite load. [?](#)

This pre-application is only for backup generation.

Planned or Existing Local Peak Demand (kW) \*

---

Planned or Existing Local Minimum Demand (kW) \*

---

Proposed facility is new construction.

---

---

# System Information

Generator Type \*

Please Describe: \* ?

System Type \*

Aggregate DER Nameplate AC Rating (kW) \* ?

Aggregate DER Nameplate DC Rating (kW) \*

Aggregate DER Nameplate AC Rating (kVA) \*

Aggregate DER Nameplate AC Capacity (kWh) \*

Proposed DER System Wiring Configuration \*

- Single-Phase
- Three-Phase

Is the DER tested to IEEE 1547.1-2020 and UL 1741 September 28, 2021 edition? \*

Are the generation system and storage system connected behind a single inverter (DC coupled) or separate inverters (AC coupled)? \*

## Acknowledgments, Signature & Payment

Pre-Application Report Request Fee  
\$ {Result}

Pre-Application Reference Number \*

Pre-Application Payment Letter

- I understand DTE Electric is not obligated to begin processing my pre-application report request until payment and the completed pre-application report request form, including any attachments, has been received. \*
- I understand that no more than 10 pre-application report requests may be submitted by an applicant and its affiliates during a 1-week period. \*
- I understand that submission of a Pre-Application Report Request form does not assign a project priority, queue position nor reserve any hosting capacity and a full interconnection application will need to be submitted separately in the Interconnection Program to be reviewed for interconnection. \*
- I understand that the pre-application report produced by the electric utility is non-binding and does not confer any rights on the applicant. \*
- I declare, to the best of my knowledge and belief, that all the information provided in this pre-application report request form is complete and correct. \*

By typing your name below, the pre-applicant acknowledges and agrees to the above terms. \*

Today's Date \*

When satisfied with the information you provided, please click 'Submit'. Your pre-application will be assigned a DTE pre-application project number (this is different from the application project number), and you will be redirected to the dashboard. The Interconnection Coordinators will be notified of your submission and will review your pre-application after the fee is received.
