

Outdoor Lighting Downtown area/streetscape solutions

A safer, more welcoming downtown promotes increased street/pedestrian traffic, and in turn, tax revenue for your municipality.

Planning an effective downtown/streetscape lighting system requires proper balance between aesthetics and safety, and we're here to help you achieve that balance. Our lighting experts understand how to properly compensate for light loss, subjective brightness, glare and other important factors while preserving the look and feel of a nostalgic historical village or bustling metropolis, and anything in between.

Interested in learning how we can help you enhance security, ambience and revenue opportunity in your community?
