

How to select the correct generator for your Surge Protection Plus device

Three simple steps to selecting the correct generator to pair with your Surge Protection Plus device.

Surge Protection Plus

If you have questions or need assistance selecting a compatible generator, refer to your Surge Protection Plus operating manual, email your questions to surgeprotection@dteenergy.com or call us at **833.452.0224**.

1 Your generator must have this receptacle:

30 AMP
L14 - 30

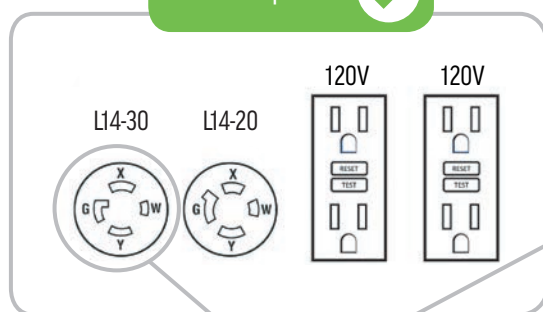

2 Your generator must be in these wattage ranges:

Generator Wattage
4,000 - 9,600 Running Watts

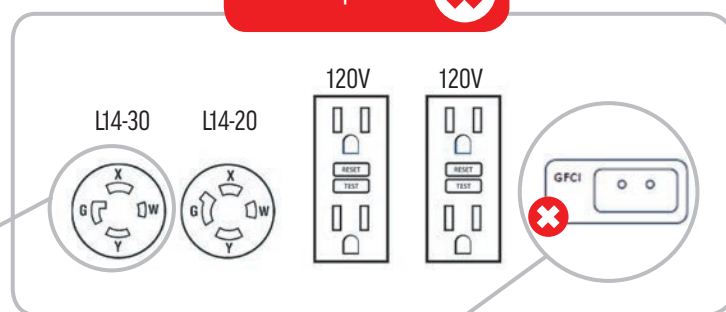

3 Your generator must Not have a full GFCI panel

No GFCI panel

- 120/240 Volt - 30Amp locking outlet (L14-30R)
- Connect the power cable from your Surge Protection Plus device to your generator by inserting the four - blade plug into the 30Amp outlet on the generator

GFCI panel

- Full Panel GFCI Protections
- Reset button that protects all outlets/receptacles
- This generator is not compatible with the Surge Protection Plus device

Surge Protection Plus is manufactured by GenerLink, a Global Power Product.
